A Wrinkle in Time

By: Ava Adams

My class read the book, [A Wrinkle in Time](#), earlier this year. It was my favorite book that we have read so far. I heard a movie was coming out based on the book, and I was excited to see it. When I went to see the movie, I thought the movie followed the book pretty well, even though there were a few differences. I was curious if the movie would show things the way I pictured them in the book.

When I read the book, I thought things would appear black when they tresered, go through the universe. The coolest thing about the movie was seeing how they did that. In the movie, the world became wavey and they traveled through the universe in all kinds of colors. I also liked the way they showed the IT, the evil trying to take over the universe. I thought from the book it would be a big human brain, but it was totally different in the movie. It was like a giant black ball.

Mrs. Whatsit was fun to watch in the movie. She spins in circles fast to change her outfit. She is always dressed in lots of colors. The other characters were very much like they were in the book. I imagined Mrs. Witch and her voice the same way the movie showed her.

If you liked the book, you should see the movie. It is one of my favorite movies now!

LAPTOPS FOR ALL

By: Darionna Wright And Kenya Smith

Should students at Justice have laptops? I personally think it's unfair that teachers at Justice have laptops. The following benefits of having a laptop is we can do group work on the laptops. For example, say kenya and I needed to do a group activity. We have our laptops. Say my math teacher said we need to take notes. Instead of wasting paper we use the laptops. Mr. Kyle said "I think it would be good for students to use laptops. They would benefit." I think we should be able to bring it home but you have to bring it back the next day. Kids can take notes during classes. For free time we can play school appropriate games

What punishments should we have? If a student is mistreating the laptops they get it taken away for a whole month, depending on how bad it is. If you don't bring it back you will have a day to bring it back. If you have more than 13 referrals the students get the laptop taken away for 3 or 4 months.

How will we raise money? We clubs would have a big meeting in the library and see what each club wants to sell to help raise money .

Newspaper club can sell raffles tickets to help raise money.

Then with some of the bookfair money we could put it into getting laptops

How will we make sure kids don't get on games? EVERY teacher is going to have to learn how to lock apps that are not school appropriate. Should we have laptops?

Pi NIGHT

By Celsi Fitch

Justice had a PI night! I did not say pie! So what is PI? It could be the sixteenth letter of the Greek alphabet or a numerical value in math. It is the fourteenth day of the third month of each year - 3/14. Pi is a math value which is 3.14159265359. Get it ?!

To celebrate this special night, many activities were planned. To begin the night the students were given a list of 10 activities to complete. This was a scavenger hunt. One of the activities was a demonstration of robots by the Robotics Club. Mrs. Persinger sold books and other things from the book fair. The profits go to new books in the library. There was a Selfie station so students and parents could take pictures of themselves. Mr. Luttrell had a PI art station. Students painted a PI picture.

Many students who attended PI Night shared their favorite activities. Several of them enjoyed the basketball game. Aiden Stoess said, "The basketball game was fun. I liked it when Mr. Luttrell took his daughter on the floor and made a shot. I loved spending time with my dad." Nathaniel Beck said, "I like watching basketball games. Students against teachers made it fun." Kenya Smith said, "I had fun seeing the girls and boys play basketball."

90s Video Games By: Andrew Hancock

We all know the popular video games such as *Call of Duty* and *Fortnite*. But have you heard of *PaRappa The Rapper* and *Banjo Kazooie*? Those were video games of the old generation, known as the 90s. It was a scary time... but not for video games! Those were the classics.

Some of the biggest titles were *Sonic The Hedgehog*, *Street Fighter II*, and *Super Mario World*. These games were all pixelated, 2d, side-scrolling games. Then came the game changer - the Nintendo 64.

The Nintendo 64 was.. Well, a legitimate game changer! It introduced 3d rendered graphics into the video game world. The most popular N64 games were *Super Mario 64*, *Crash Bandicoot*, *Final Fantasy VII*, and *Mario Kart 64*. There was also one interesting game on the PlayStation called *PaRappa The Rapper*, which had a sort of 3D paper-ish kind of look. I personally think that the style looks awesome and should have some kind of High Definition reboot.

So, were the 90s video games good? My answer - yes. They had very unforgettable titles that are loved by adults and children like me. If you have a chance, play those games. You'll have a great time!

Source - I guess you could just Google "90s video game list", and there will automatically be a list of a lot of popular 90s games.

Student Chat Rooms

By: Alyssa Dunham

Should we have online chat rooms for students? There are many Pros and Cons. First of all, you could get some help with homework or schoolwork. Second, it helps kids with their social skills. Now for the cons. One of them is that some students would talk about things that are not related to school.

Why Do Dreams Occur?

Zzz...

By Rylan Cox

You wake up, you were dreaming the craziest dream EVER! But you have one question...Why do dreams occur?

Well, it's R.E.M. Which stands for rapid eye movement. It's a stage of sleep where your brain is most active. You don't always dream though. But what causes you to dream? It's mostly based on the acts of your day. For example, if I go to the pool, chances are, I will have a dream about swimming, BUT THEN A KILLER SHARK JUMPS OUT AND BITES ME TO PIECES! That leads us into the topic of nightmares...But that's for the next issue. Stay tuned!

My interviews:

Andrew Hancock said, " I dream about weird stuff. Like going into a church, and falling down some stairs." Ooooh boy.

Mrs Persinger said, "One time in college I dreamt that I overslept through the final exam...In reality, I actually did!"

Giraffes

By Ava Marroni

Giraffes are incredible animals. Healthy giraffes can live up to 20 or 25 years old in the wild. In captivity, they can live 28 years or longer. Giraffes are the largest mammals. Giraffes only need half an hour of sleep a day, and they sleep standing up with their eyes open, so you can't really tell if

they're sleeping or not.

George Washington Carver
By: Ashiyah Teague and Janea Love
Growing Up

George Washington Carver was born January 1864 in Diamond Grove, Missouri. He was best known for discovering many ways to use the peanut. He came up with products that can be made from peanuts. Those products are cooking oil, dyes for clothing, fuel for cars, and peanut butter. As he was getting older he got more and more interested about learning. He was especially interested in animals and plants. He also liked to read the Bible.

His mom, Mary, was a slave while he was getting taken care of by a white family. Their owners names were Moses and Susan Carver. Raiders stole George and his mom from the Carvers. Moses went to look for them but he only found George left by the road. George was raised by the Carvers and slavery was abolished. For the rest of their lives the Carvers did not have any kids of their own.

Sleep Paralysis

By: Aryssa McCord

A sleep paralysis is something that happens when you either fall asleep or wake up. If you wake up to R.E.M (rapid eye movement) sleep paralysis will occur. If you sleep on your back, this may be more of a risk. This usually happens when you don't relieve stress, or get enough sleep. Sleep paralysis usually happens to the ages 14 and above, but can occur to the ages under too. Some sleep paralysis can have hallucinations too. If you have a sleep paralysis you can feel a scary presence, and your heart rate can go up. When you have a sleep paralysis, you can't just wake yourself up. You'll have to wait it out, which will take seconds to minutes. People have been trying to explain this for centuries. There is rumor to be a demon of sleep paralysis. There are many names for this demon. One being the Night Hag, that being its English name. Another one being Incubus, this one is usually male and attacks mostly women. Another one being Necnitsa. Many people have suffered from this rare occurrence.

CREATURE DEPARTMENT REVIEW

Edited by: Rylan Cox, Aryssa McCord, Damien Martin, Caleb Huff, Whit Booher, D'nei Smith, and Ashiya Teague. Written by...Dyllon Coulter.

The Creature Department was written by Brian Rood.

REVIEW BY DYLLON COULTER Do you know what Creature Department is? I got my sources from the book "Creature Department" by Brian Rood and this book will be in the library in a few months!

EXPOSITION

There was once a kid named Elliot. He loves to wear this green fishing jacket. His parents are food critics. One morning he found a letter so Elliot opened it. The letter was from his grandpa at key."Von D said, "I have invited you to the Creature Intensifies Department." Elliot went and got his friend Leslie.

Climax

Many people think Monsters are fake, but creatures are real. The key that Von has is for this small room when Von opened the door there were creatures inside Von said, "Any thoughts.

RISING ACTION

They finally go to the mystical and awesome DENKI-3000! Elliot said, "WOW!" Von looked scared so he started looking around. Von said, "Ha, I found it." (and it was a key). Leslie said, "why you need the They went down the hall then, opened the door and... #breathing

FALLING ACTION

Elliot and Leslie got to know the Creatures, one is named Remy Jean

Leslie and Elliot said about a hundred.”

Resolution

TO SUM UP THIS BOOK IS AMAZING

Editorial: **Why We Should Have Breaks by Whit Booher**

We have about 6 hours of school. But we only have one break. I think we should have at least 3 because we would have less stress. I have had breaks in school it helped a lot. Also there have been many studies of sleep effects on school.

P.S. END JEFFY!!! plz

“If you’re imitating Jeffy, you’re really immature....He’s just bad. Like everything about him...But, please don’t SUE ME for having my opinion.”

--Rylan Cox, 5th Grade.

The Vending Machine is too Pricey!

By Caleb Huff And Damien Martin

Have you ever thought the vending machine was too pricey? Many students including most of the Girls Basketball Team, Mike Herrington, Noah Rhoadarmer, Xavier Wood, and Larry Cox say it is. The Girls Basketball Team says that the vending machine should cost less. Mike Herrington, Xavier Wood, Larry Cox said to lower the price on pop. (The switches) Noah Rhoadarmer said to lower the price on Gatorade. This is our students opinion of the vending machine!

Pokemon of the week: Rotom Frost

Discontinuation of Disrespect

By:Emily Luckey

One minute you could be hanging out with your best friend and the next you could be alone because of a joke you thought was harmless. We have to be careful because some words we use can hurt others even if we don't mean it. Like when we talk to kids that others don't talk to, kids with disabilities, or even our best friend/s. Some words to lose are: dumb/deaf-mute, instead say, deaf or hard of hearing. (Even if you don't like someone you can still be nice.) Another is patient, instead say, use only if under a doctor's care. Some things we say and we don't realize that we hurt people. Like you can just joke with someone and they could take it personal. (Even if you didn't mean it.) So, be careful of what you say in text, out loud in words, or even on social media.
